WORK EXPERIENCE

05/2021 to Present **Research scholar - technician**, University of Florida (UF), United States

I am working on research projects leaded by Dr. Bulitta at College of Pharmacy, UF Lake Nona, Orlando. My research work is focused on doing binding studies of β -lactam antibiotics with penicillin-binding Proteins (PBPs) in both purified membranes and whole cell assays. I used to do protein assay, SDS-PAGE electrophoresis, PBP binding assays, confocal microscopy and flow cytometry.

11/2018 to 03/2021 **Master student**, Fayoum University, Egypt

I did research for the M.Sc. degree at the National Research Center in Cairo and Fayoum University in a project entitled "Targeting human colon cancer by plant extracts belonging to family Agavaceae: in vitro tests". This study was focused in studying the anticancer effects of methanolic extracts of 15 Agave plants on human colon cancer cell line HCT-116. So, microscopic examination, biochemical assays and cytotoxicity studies were performed in cancer cell line HCT-116 and human normal epithelial cell line RPE1. I also did apoptosis-mediated assays to study the levels and activities of caspase-3, p35, Bcl-2 and Bax in addition to DNA fragmentation.

EDUCATION

2018 - 2021 **M.Sc. Biochemistry**, Fayoum University, Egypt

2011 - 2015 **B.Sc. in Biochemistry and Chemistry**, Fayoum University, Egypt
